TEMPRAKON®

TEMPRAKON® is based on the latest technology and uses the same materials that NASA uses in space suits to regulate the astronauts' temperature under the extreme conditions in space.

FROM SPACE RIGHT DOWN TO YOUR BEDROOM

With a high level of activity in everyday life, you know, how important it is to be able to get a good night's sleep. The most common cause of poor sleep is that the body either gets too cold or hot - with TEMPRAKON® you get the optimal regulation of your body temperature - throughout the night.

FILLING: TempraDown

FABRIC: 100% cotton / TempraCool, Batiste

This is the 4th generation of the original - and the world's first - duvet series with built-in active temperature control in both cover and filling.

The filling in the duvet is our specially developed TempraDown, which is a mixture of 70% delicious soft goose down and 30% TempraCool microcapsules.

The fabric is made of 100% cotton and is coated with TempraCool microcapsules on the inside of the duvet's middle cassettes for optimal heat regulation.

The wood fibers in the duvet fabric are made according to the award-winning Lyocell method, where 99.7% of the wastewater is recycled, thus reducing the impact on the environment in production.

The duvet wraps around the body and actively works to regulate your body temperature. It cools when you feel hot - and warms when you feel cold.

DOWNPASS

As the duvet filling is a mixture of down and actively temperature-regulating microcapsules, the duvet cannot be DownPass 2017 certified.

As the duvet is produced at our factory in Vamdrup, where we only use down that is DownPass 2017 certified - we can guarantee full traceability and animal welfare on an equal footing with our certified down duvets.

FILLING: 250 g. duck down/-feather and foam core
FABRIC: 100% cotton / TemptraCool, Cambric, Ergonomic

Ergonomic pillow with a uniquely shaped avidorm foam core that has different heights for optimal headrest.

The pillow can be adjusted in height by removing one of the foam cores.

The outer chambers of the pillow are filled with soft down that provides a really good comfort.

The pillow spring is made of 100% cotton and lined with lyocell coated with TemptraCool microcapsules, which are active temperature regulating, and thus the pillow is nice and cool to put your head on. This pillow is suitable for you, who want extra headrest.

FILLING: 2 x 120 g. duck down/-feather and foam core
FABRIC: 100% cotton / TempraCool, Cambric, Ergonomic

Ergonomic pillow with 3 chambers built in layers.

The outer chambers are filled with soft down. The inner chamber is filled with small supporting foam cores, which provide the right combination of softness and support for the pillow. The fiber threads in the foam cores are developed, so that the cores do not stick together, which ensures an optimal distribution of the filling in the pad. The cushion can be adjusted in height by removing some of the foam cores in the inner chamber.

The pillow spring is made of 100% cotton and lined with lyocell coated with TempraCool microcapsules, which are active temperature regulating, and thus the pillow is nice and cool to put your head on. Suitable for you who want a soft and malleable ergonomic pillow.

FILLING: 2 x 120 g. duck down/-feather and foam core
FABRIC: 100% cotton / TempraCool, Cambric, Ergonomic

Ergonomic pillow with an avidorm foam core that gives you optimal support for head and neck.

The pillow has one fixed height - and, unlike the U and V pillows, can not be adjusted in height.

The outer chambers are filled with soft down, for optimal comfort.

The pillow spring is made of 100% cotton and lined with lyocell coated with TempraCool microcapsules, which are active temperature regulating, and thus the pillow is nice and cool to put your head on. Suitable for you, who sleep most on the side and back.

FILLING: Duck down and moulded foam

FABRIC: 100% cotton / TempraCool, Super Cambric

Ergonomic pillow with a uniquely shaped avidorm foam core that has different heights for optimal headrest.

The outer chambers of the pillow are filled with soft down (120 g in the top and 80 g in the bottom) that provides a really good comfort.

The pillow spring is made of 100% cotton and lined with lyocell coated with TempraCool microcapsules on one side, which are active temperature regulating and thus the pillow is nice and cool to put your head on. This pillow is suitable for you who want extra headrest.
